Research:

Three clinical trials have been conducted at the University of Western Ontario regarding the DizzyFIX device. The concept of a head-worn visual feedback device has been proven with healthy volunteers in a randomized clinical trial. In addition, the reliability of the device in predicting a correct maneuver has been demonstrated. Finally, 88% of patients who used the DizzyFIX for the self treatment of BPPV were successful. This cure rate did not differ significantly from the 83% success rate in patients who had treatment maneuvers guided by an ENT physician. These three studies have found the DizzyFIX device to be safe, simple to use, reliable and effective.

Anyone can treat dizziness*
with the DizzyFIX

K081602

*The DizzyFIX treats dizziness related to BPPV only

Everyone has experienced dizziness.

The most common cause of dizziness related to the ear is Benign Paroxysmal Positional Vertigo (BPPV). BPPV is caused by free-floating crystals in the inner ear. These crystals cause spinning dizziness when disturbed by head motion.

There is, however, an effective treatment for BPPV. The DizzyFIX enables anyone to perform a "Particle Repositioning Maneuver". This maneuver cures most cases of BPPV.

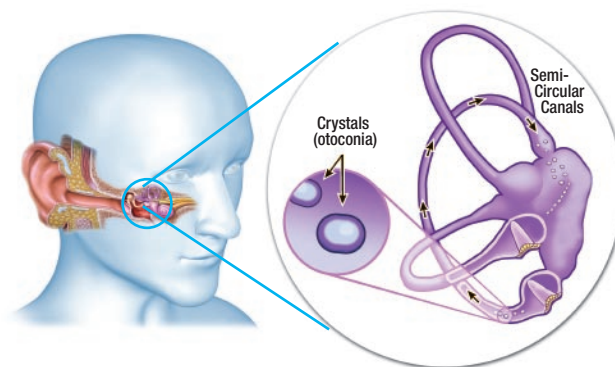

Whether being used by a patient at home, a doctor or other health professional, this device helps diagnose and treat BPPV.

+ Dizziness can be debilitating.

Benign paroxysmal positional vertigo (BPPV) is the most frequent cause of peripheral vertigo. The incidence of BPPV increases with age and has been reported as greater than 9% in people over 60 years old. Recurrence rates have been reported in up to 50% of patients.

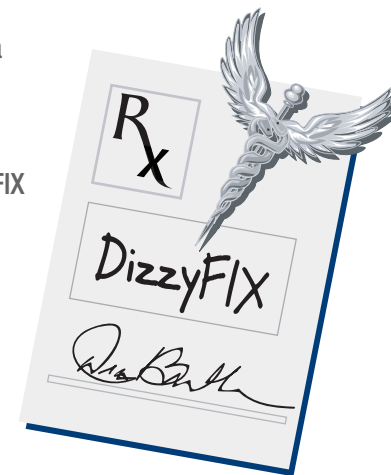

Do you have the symptoms of BPPV?

- I am dizzy when I roll over or move my head in certain ways
- The sensation I experience lasts only for a few minutes, but nausea can last longer
- The room spins when I lie down

How Do I Get a DizzyFIX?

You need to obtain a prescription from a licensed healthcare provider for a DizzyFIX device. Once you have a prescription the DizzyFIX needs to be ordered directly from Micromedics.

Once I Have a Prescription How Do I Order?

You can place your order online at www.micromedics.com or you can call our customer service department toll free at **1.800.624.5662**

Once we validate the prescription your DizzyFIX will be shipped right to your door.
